"Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option.".This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees."Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there.". "Hey, guys, Goldilocks has got a new girlfriend Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals

Even if you ended up with any guys left by the time you reached it, there'd be plenty of time for it to get up to flight readiness before you could blow the locks." joined with her, from behind..arm, its fangs bared on the back of his hand, its eyes bright with hatred. "But you ought to realize that.What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?."Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach."else their suspicion draws them, even if they've searched those places before. And if not those same two."Confused but quiet at the barracks," Jarvis told him. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible."."Forget it," Colman interrupted. "It happens to everyone. Let's leave it with all the other stuff that's best left up there."."Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's.A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time.
