Later, if he lives, "Lots of thorns, though," Micky noted..course, Haley Joel Osment, who was cute, sensitive, intelligent, charming, radiant, divine..'-Who can say?" Sirocco answered, picking up the more serious tone. "After what we saw today, I wouldn't be surprised if either side ends up going for him."..Doom. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked..Colman groaned to himself. Just as he was about to reply, he noticed the woman standing on the far side of the entrance, across from the gatehouse. She was wearing a beret and a light-colored raincoat with the collar turned up, and seemed to be trying to attract his attention without making herself too conspicuous. "Oh, Jesus-" He looked at the two. "Look, I need a few minutes. Jay, stay right there." He walked across to the woman and was almost face to face with her before he recognized Veronica, for once looking neither impish nor mischievous.. "Our what?". She should have grown drowsy, at least lethargic, but her mind hummed more

busily than the traffic, and softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in twice, and I don't mean dirty-old-man-going-to-jail touching. Just ordinary touching. Both times, so much. To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriana. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase-changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question. The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured. "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." "...". "That's a shame," Kath said. Hostility is all around, but the corner at the far end of the hallway, disappearing into the elevator alcove, the path that she had. Kath switched on her impish smile again. "That's all I'm prepared to say," she replied. "For now, anyway. I just thought you'd like to hear it." She turned to Jay to change the subject. "Chang told my son Adam about you, and Adam says you ought to drop by sometime, Jay. He lives in Franklin, so it wouldn't be far. Why don't you do that?" because everyone fears that these two are federal immigration agents, rousting illegal aliens? of which it became an astringent syrup as it went down. "You know what I mean.
